DXpedition News

Ocean Island - T33 Jim Smith VK9NS's plans to activate Ocean (Banaba) Island as **T33JS** have him arriving in Tarawa T30 on April 29. The exact date of operation from Ocean Is. depends on boat transportation to Ocean, a few days later. He'll be there about two weeks. QSLs and donations go to the Heard Island DX Association, Box 90, Norfolk Is., South Pacific 2899. (Send a separate SAE and IRCs for any other callsign Jim manages.) While on Ocean, Jim will make arrangements for a multi-operator DXpedition to the anticipated New One.

Revillegigedo - XF4 The **XF4L** operation is on target for April 11-19. They'll be on 1825, 3501, 7001, 14020, 21020, and 28020 kHz on CW, and 3795, 7080, 14140, 21195, and 28495 kHz on SSB, presumably listening up. QSLs and donations go to Jarmo Jaakola OH2BN. XF4 ranks 21st in The Most Wanted Survey in Europe.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Macao - XX Hiroo Yonezuka JA2EZD will operate from **XX9KA** April 7-10, concentrating on Europe and North America. He'll take an amplifier and a beam, and should be very workable.

Marion Island - ZS8 Peter ZS6PT should be on as **ZS8MI** by this time. All gear, including 6 meters and the logging computer, checked out prior to his Mar. 29 departure from Capetown. QSL home call.

Oblast 52 - UI-T Look for **UI8IAY, UI8IF, UI8QZ** and **UI8QU** all **/UI8T** from Oblast 052 April 11-17, all bands CW and SSB. QSL to Valery Volkov UI8IAJ, Box 71, Samarkand 703000, Uzbek SSR, USSR, with SAE and two IRCs. Valery also has logs for the May 1988 UI8V operation and the Aug. 1988 UI8Q trip.

Svalbard - JW Kirsti VK9NL and Laila WA4ZEL will be **/JW** in June, emphasizing CW. QSL to home callsigns.

Shortly Noted

- Alan TU4BR, formerly **/5U7**, starts a two-year assignment in Liberia EL April 9. He'll be running more power than he did in Niger, and hopes to have a better antenna farm. Look for plenty of contest activity. He'll also have a computer for logging. QSL, as usual, via KN4F.
- **JX0A** is from a station drifting on the Arctic ice pack, around 84° North, 10° East, until May. (Since this is a 'maritime mobile' operation, it does not count for DXCC.) QSL to LA5NM.
- Look for **N2OO/SV5** and **SV0AA/5** from Rhodes Apr. 11-20, 160-10 meters, CW and SSB. QSL via N2OO.
- WA4VCC, WW4T, K4MQG, and AA4SC will be on from French St. Martin FS June 7-13, including the June VHF contest. They plan to have a beacon on 50085 kHz, and to monitor the 6-meter coordination frequency of 28885 kHz. QSL to KF4HK (1989 *Callbook*.) They'll also be on OSCAR 13. modes B and J.
- A couple of pirate operations: **JX5TJ** (June 1988), and **T78U** (February, 1989).
- John Thompson W1BIH wraps up his **PJ9JT** operation April 18. QSL to W1AX.
- **YK1AO** is often on 14017 kHz at 04-0500Z, with very slow speed CW. Crank those keyers down!
- **FY/F3OA** is active until April 7, on 14021-27 kHz, 21021-27 kHz, or 28021-27 kHz after 2100Z. QSL home call.
- Dick G3PFS is on as **CT3EU** from Madeira (AF-14) to April 13. QSL to his home call. (Tnx DXNS.)
- The very active station **TU4CO** winds up his Ivory Coast operation next month. He hangs out 10 kHz up on CW. QSL via TU2KC.
- OH5VD has been on as **FR0VD** from Reunion Island (AD-16). QSL home call.
- Members of the Stork DX Group will be on as **LX/PA3DKC** on all bands, CW only, April 7-10, with special emphasis on the low bands to Asia and USA. QSL PA3DKC.
- F6FYD has obtained the license **T5YD**. He'll be there six months. QSL via F6AJA.
- The **5R8AL** operation is delayed until May.
- DL2GAC wraps up the Solomon Island H44 leg of his Islands On The Air DXpedition in mid-April, and returns to Papua New Guinea P29, where he'll go to Tanga and Green Islands.
- Joe Reisert W1JR made 9BDXCC, with his 17-meter DXCC on March 29. Any other 9BDXCCs?
- The semi-annual DXCC Honor Roll listing will not be in the June issue of *QST*; it's delayed until the July issue. The new 80-meter DXCC list will be in the June issue.
- Regulars (callsign, frequency or band, UTC): **4S7RO** 3506 23-2400Z; **3B8CF** 14033 0300Z; **4S7EA** 20M CW 00-0200Z; **OD5LX** 14002 03-0400Z; **SU1EE** 20M CW 04-0500Z and 14188 02-0300Z; **VS6VC** 15M CW 14-1500Z; **BY4RB** 28019 0030-0130Z; **CE0FFD** 10M CW 23-2400Z; **HL5BDS** South Shetlands 28003 20-2400Z; and **VQ9QM** 28029 17-1800Z.

Propagation Watch

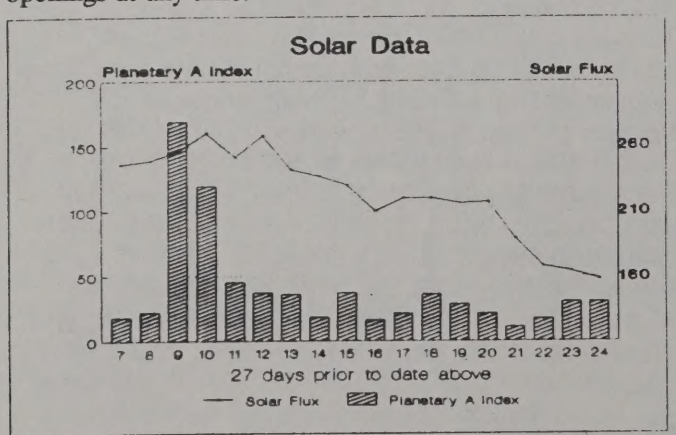
Relatively low solar flux levels and an active geomagnetic field took some of the edge off the anticipated good DXing around the equinox. Solar activity dropped by about 100 points at the end of March, before beginning to climb back. The planetary A index has been above 20 most of the time.

The active geomagnetic field affects the polar paths particularly. When the planetary A index is above 20, the polar path becomes very difficult, and the evening path into Russia, China, and India often disappears. On the few days of relatively quiet geomagnetic activity, such as during the CQ WPX SSB test, the higher latitude paths are very productive.

On days of higher geomagnetic activity, the low-latitude paths are still available, especially north-south. Even 6 meters has been open to southern Africa, South America, and ZL/VK on many days.

The prognosis for the next couple of weeks is mixed. Giant sunspot region 5395, the region that produced the solar fireworks in mid-March, is on the visible side of the sun again. We expect the solar flux to climb back to 225-250, and another burst of major flares. Sunspot regions typically don't last for months at this stage in the sunspot cycle, but the side of the sun that contains Region 5395 is unusually active, and we will very likely see disturbed conditions mid-month.

On those rare days of relatively quiet geomagnetic activity, make good use of the polar path, including both at local dawn, and late evening, mainly on 30-18 meters. The higher bands will be good most days, in the absence of a major storm, opening very early in the morning, and staying open well past local sunset. The absorption will likely make 160-40 meters difficult, but try 40 meters late at night, and around local dawn. And watch 6 meters for north-south openings at any time.



USSR-USA Contest

The first run of the USSR-USA contest is April 9, 00-2400Z. The contest is on 10, 15, and 20 meters only, with single op-all band and multi-single-all band categories. CW only, SSB only, or mixed mode. USA stations call CQ U and send signal report, QSO number, and state; USSR stations call CQ USA and send report, QSO number, and Oblast number. One point per QSO, no multipliers. You select your best five hours of operation, in up to five separate periods, with each period being at least 10 minutes long. Logs go to the Federation of Sport, Box 88, Moscow.

DX Notes

▪ The Natal DX Group in Brazil is continuing to work for the May operation from St. Peter and Paul Rocks ZY0S. They have received a few donations, but still seek more help with the estimated US$3,000 in expenses. Donations should go by registered air mail to their **new address**: Caixa Postal 597, 59021 Natal, RN Brasil.

▪ The Natal DX Group has received some QSL cards for **ZY0SW** on March 4, on 20-meter CW. There was no such operation, and these QSLs are being returned marked "pirate."

▪ Hans Schouenberg ex-**4W0PA** did not make copies of his operating permission. The originals were confiscated by the Yemeni authorities before Hans was forced to leave the country. The original operating permission was issued in The Hague by the Yemeni Embassy; perhaps copies can be obtained from that source. Meanwhile, no documents have been submitted to the ARRL DXCC desk. Hans lost his station, his job, and all donated equipment in the incident. DXers wishing to help Hans rebuild his station can send donations made out to Doctor Hans Schouenberg via PA3CXC, or WA3WIP (1988 or 1989 *Callbook* address.)

▪ John CE0ZAM has a license to operate from San Ambrosio Island in the San Felix group: **CE0XDX**. He plans to go between October and December of this year. San Felix ranked 38th in the Most Wanted Countries list.

QSL Information

▪ The address for the French DX Foundation, QSL address for the **FO0CW** and **FO0EXV** operations from the Marquesas and Austral Islands in French Polynesia, is: Box 88, F35170 Bruz, France. (An earlier address had an incorrect postal code.) An application for separate DXCC status has been submitted to the DXAC, but a literal interpretation of the new DXCC rules would seem to make separate country status unlikely.

▪ Victor Tkachenko RB7GG is QSL manager for the very active Zone 23 station **RV0YF**. Victor also handles cards for **UA0KK, UJ8XA, UA0ZZ, RL9MM, RH8AA, RH8AX, EO5BGH, RB0GWG,** and **UG6GM**. Victor's address is P.O.Box 73, Kherson 325000 USSR.

▪ The two British DXers who operated from The Gambia earlier this year made 14,783 CW QSOs in their 7-day trip. QSL **C56/G3SXW** to Roger Western G3SXW, 7 Field Close, Chessington, Surrey KT9 2QD, England. The *Callbook* address is four years out of date.) QSL **C56/G3TXF** to Nigel Cawthorne, Holt Cottage, Kingston Hill, Kingston-upon-Thames, Surrey KT2 7JH, England.

▪ The **ZP0Y** operation in the WPX SSB test was by Luis Kemper ZP5JCY. QSL via Box 416, Asuncion, Paraguay, or via the ZP bureau. He'll use that call in all major contests in 1989, including WPX CW, IARU HF, both CQWWs, Worked All Europe, and ARRL 10-Meter test.
